

Isi Pawa (Solar Generator)

info@isilinkit.com (IsiLinkit Ltd - PNG)

SOLAR GENERATORS

A Solar Generator can benefit the home in a variety of ways. Depending on the size, it can allow a homeowner and family to remain unaffected in the event of a power failure. It can also be used to simply cut the costs of daily energy use. In very simplified terms, a solar generator works by converting solar energy into electrical energy. Best for remote villages and stations in PNG

It's not only a solar backup power system, also an entertainment center. This portable solar generator has all features that our other solar generators have, turn-key solution, ready for immediate operation, all in one box, high portability and wide applications. What makes a difference is this box has built-in speakers, mp3 player, radio, LED lamp and SD card slot. You could convert it into a self-powered entertainment system in one minute.

Features

One box autonomy solar power system, easy to operate. High portability, lightweight, easy to move. Self-sufficiency, just use it where needed, leave it under the sunlight, it will do the rest to be ready for next use. Adaptability, DC 12V & AC 220V output, suitable for various applications.

Entertainment functionality, built-in speakers, mp3 player, radio, LED lamp and SD card.

Wide applications, including hunting cabins, outbuildings, contractors, survivalists, farmers, tailgating, outdoor events, long-distance travel, household appliances, and camping.
