512/256	K2,182.00
1024/256	K3,200.00
1024/512	K3,494.00

Terminal Equipment

For hardware at the VSAT site, you will need a dish plus a Shiron ACM DVBS2 Satellite Modem "kit".

Dishes

We offer 1.2 and 1.8m dishes. Almost all the sites we ship use 1.2m dishes which give you good availability but are not sufficient for larger trunking and ISP applications. If you are running a larger link and you have several customers, you should consider a 1.8m dish.

1.8m dishes cost more to ship and fit but provide a stronger signal and are more robust during heavy rain. 1.8m dishes are recommended if you think you may upgrade to higher uplink speeds in the future, and for areas with poor satellite reception. Please bear in mind that a 1.8m dish is a very heavy thing and needs a good mounting!
